

# Number crunching with R #3: Creating effective charts

Webinar series by Mihail Peleah, IRH

Presentation by Uyanga Gankhuyag, BRH

15 December 2020

*Empowered lives.  
Resilient nations.*

# Contents:

- Why R? About R.
- Examples of data visualization (aka charts)
- Using R to create effective charts (just a flavour)

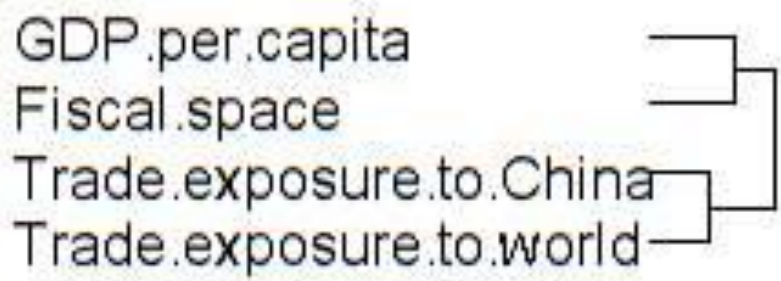

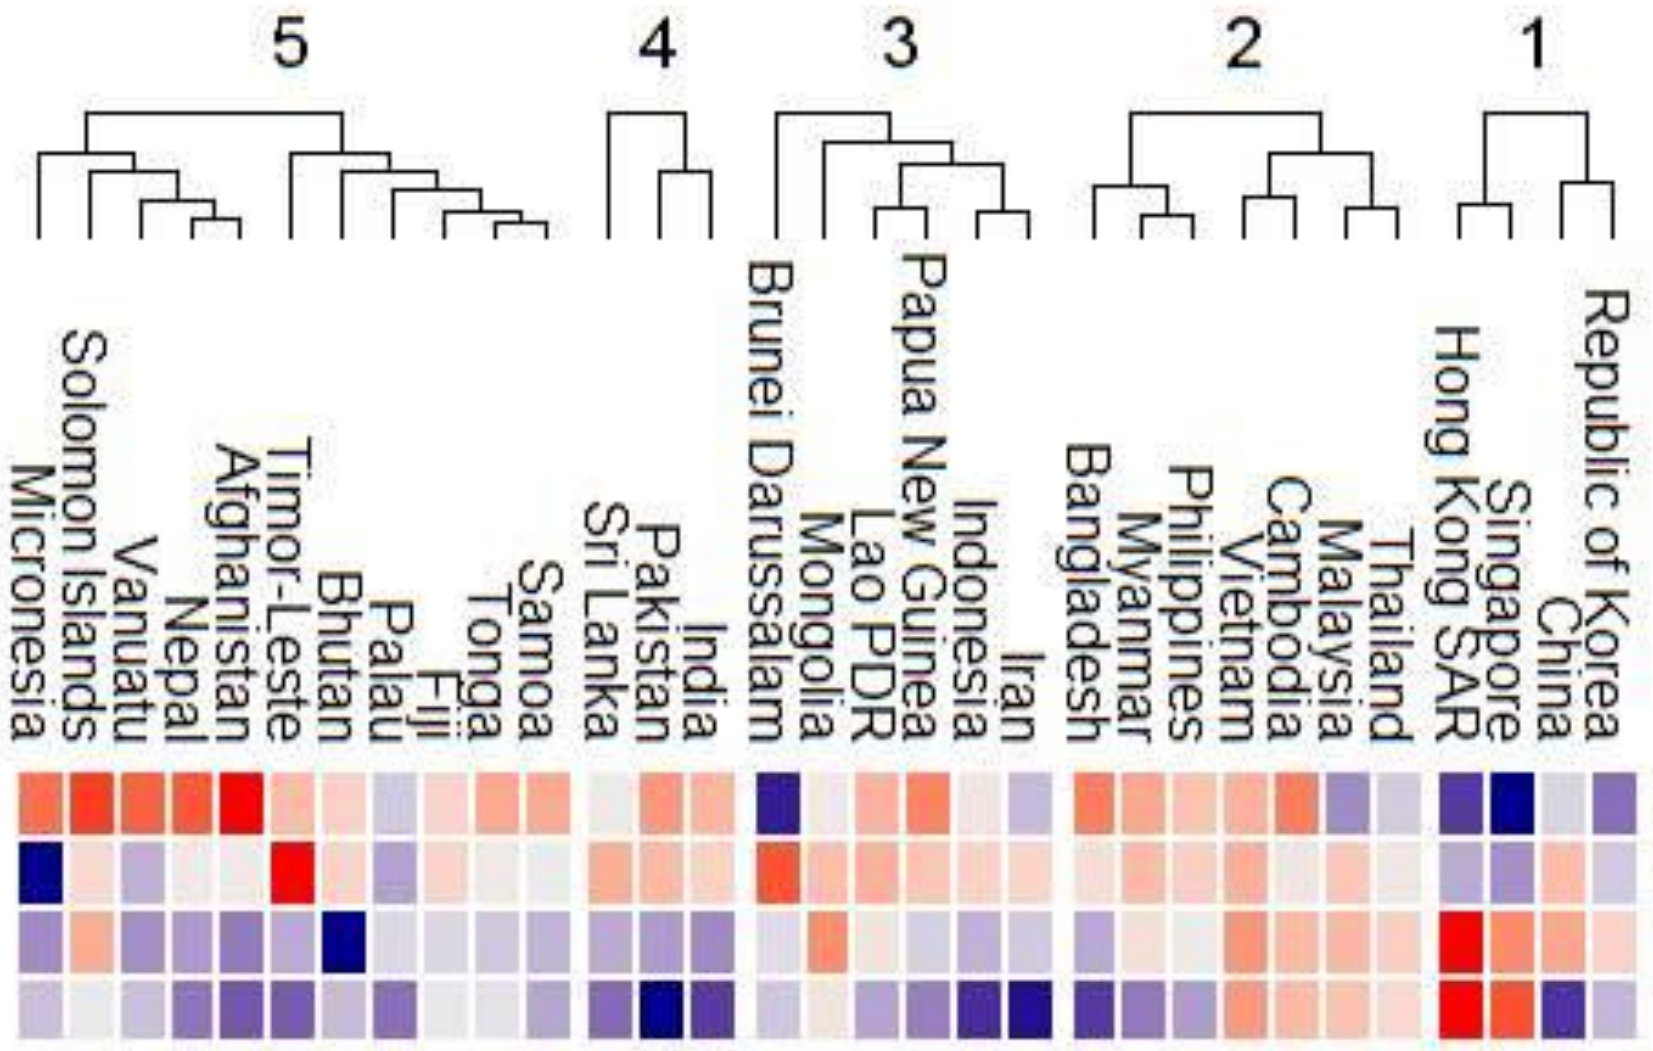

# Why R? About R.

- Excel, STATA/ SPSS, GIS-like capabilities (data manipulation, statistical analysis, visualization, maps)
- Open-source: free, but not costless (steep learning curve, time investment)
- Base R + Rstudio
- Packages
- Worldwide community of R developers and users

# Examples of data visualization

Asia Pacific | China | Afghanistan | Tajikistan

A

# Asia Pacific

**FIGURE 4. EVERY ECONOMY IS AFFECTED IN ITS OWN WAY – SHARING EXPERIENCES AND DIFFERENTIATED STRATEGIES ARE NEEDED**

	<b>CLUSTER 1</b>	<b>CLUSTER 2</b>	<b>CLUSTER 3</b>	<b>CLUSTER 4</b>	<b>CLUSTER 5</b>
	<b>Very high to high human development, advanced manufacturing value chains</b>	<b>Mostly high or medium human development, integration into value chains</b>	<b>Wide range of income and development levels, reliance on natural resource exports</b>	<b>Medium to high human development, relatively less trade integration</b>	<b>Wide range of human development levels, LDCs and SIDS</b>
<b>Spread of the pandemic and responses</b>	Pandemic's early onset, focus on rapid containment, extensive stimulus packages, signs of early recovery	The "second wave" of the pandemic, stimulus packages and containment measures	Different degrees of the spread of the pandemic and wide variety of responses	Late wave of the pandemic, extensive containment measures, massive public health risks	Relatively isolated and potentially less affected by the pandemic, but public health risks due to low capacities
<b>Level of human development</b>	Very high or high human development	Ranges from very high to medium human development	Wide range from very high to low human development	High and medium human development	Wide range of human development levels, but mostly medium level
<b>Degree of global value chains integration and trade</b>	Highly integrated in advanced manufacturing value chains	Integrated in various manufacturing value chains	Forward linkages through supply of natural resources	Lower degree of trade openness	Small open economies, high degree of imports

# Afghanistan: Exports by country and product category

- Package: treemap
- See alternative:

<https://oec.world/en/profile/country/afg>

Major exports of Afghanistan, average 2017-2019

# Asia Pacific: Socio-economic impact assessments

- Package: ggplot2

**Figure 1. The timeline of Asia Pacific SEIAs**

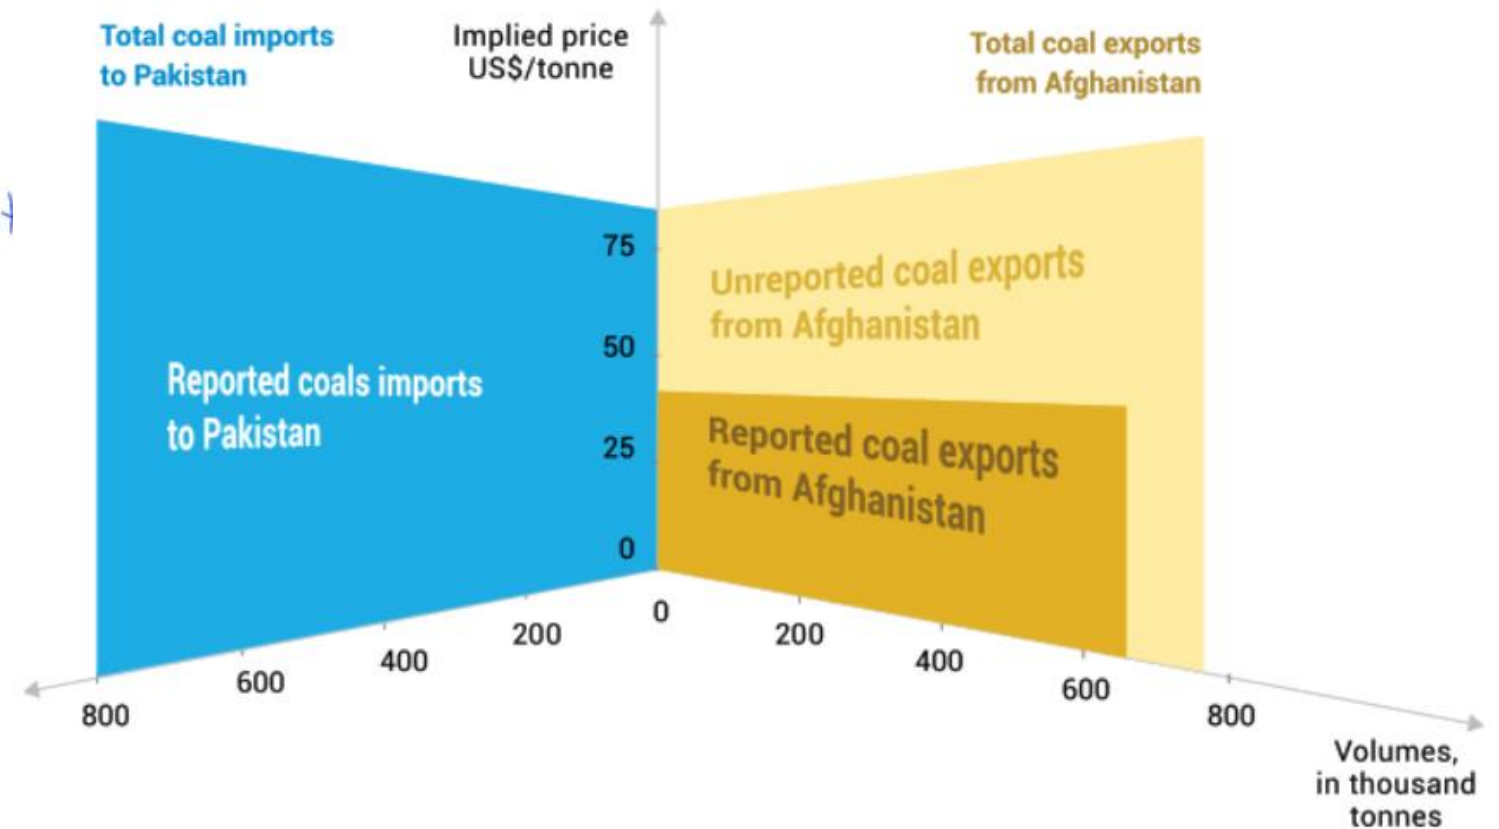

# Afghanistan & Pakistan: Discrepancies in exports – smuggling of minerals?

Low-tech works too

Coal exports from Afghanistan to Pakistan, annual average, 2015-2018

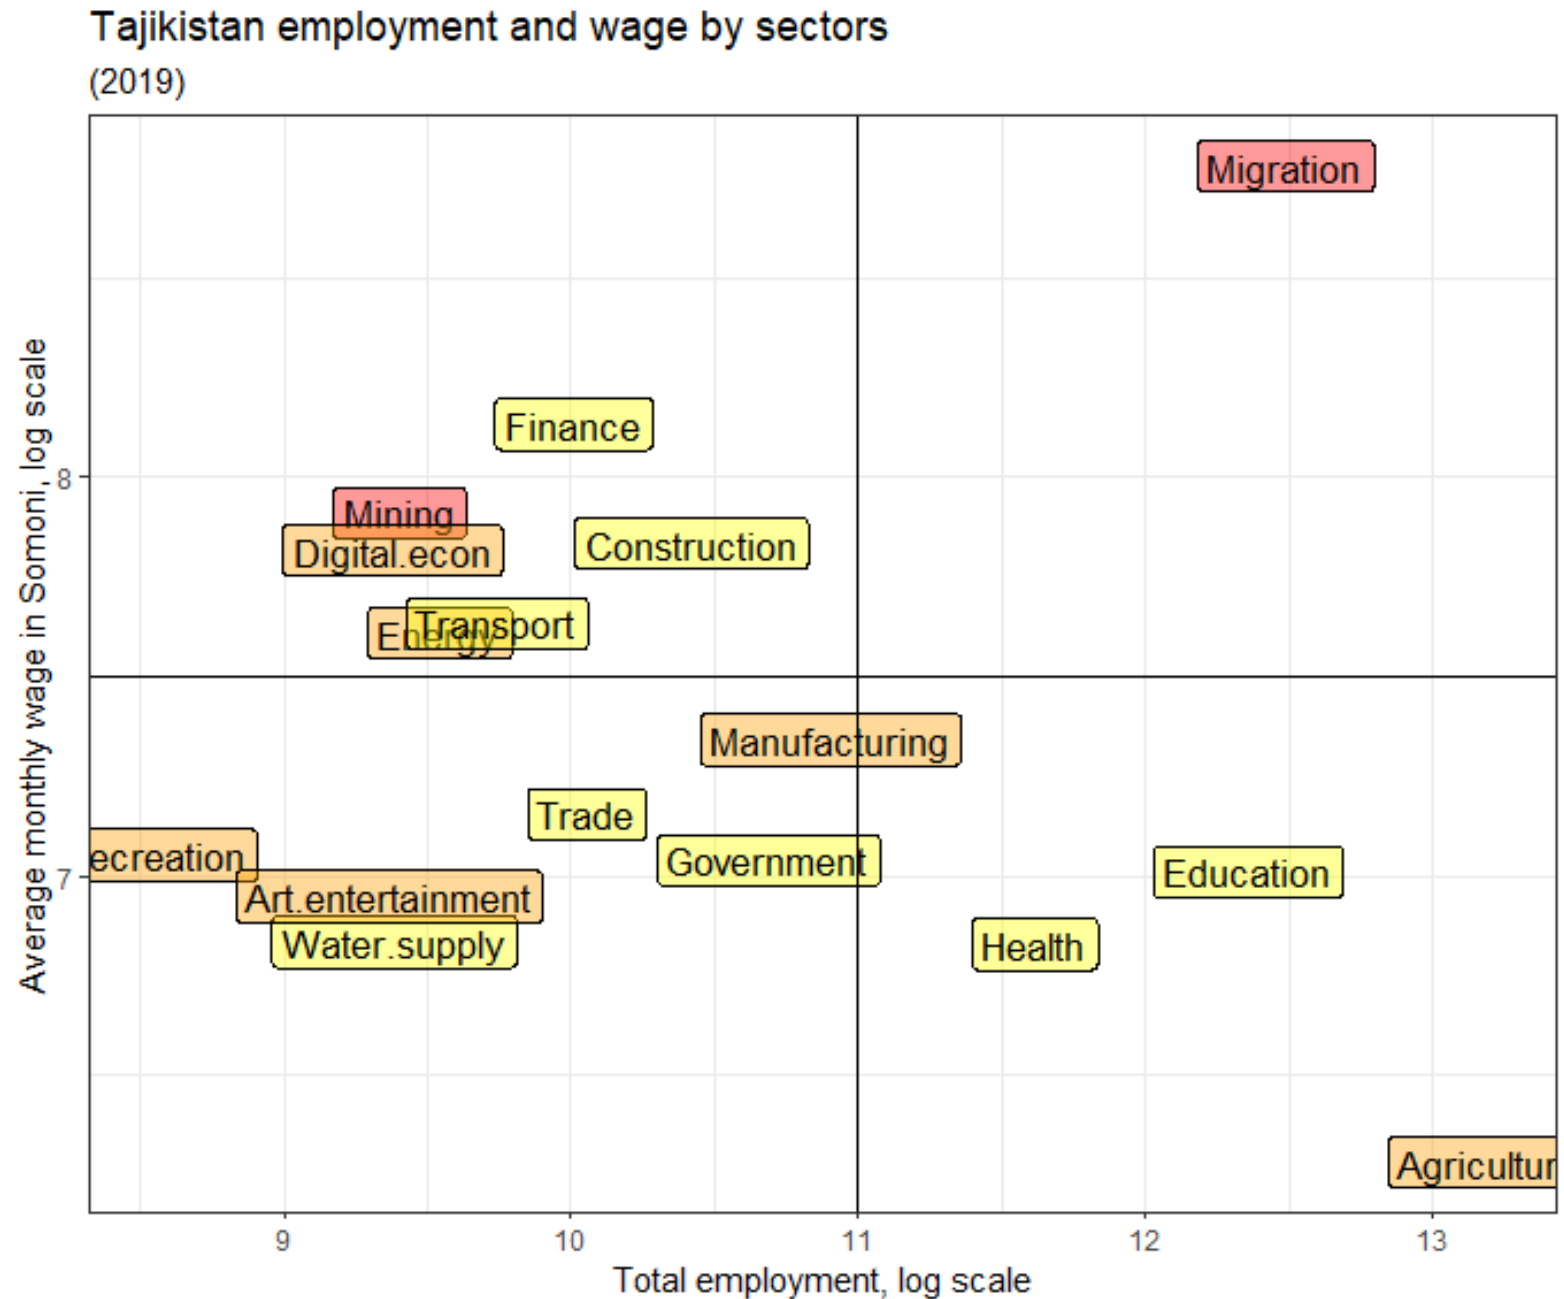

# Tajikistan: Inclusive growth strategy

Package: ggplot2

1. Employment
2. Wages
3. Sectors
4. Type of sectors (tradable v. non-tradable)

## Let's use R!

Source: Tajikistan Statistics Agency, World Bank WDI, UNFPA, ILO

# In conclusion

- Decide whether to invest your time in R
- Data viz - only one of the links in the data “value chain”
- Join data groups in UNDP: [Here we R](#) at Teams
